ABOUT

I am a software engineer with expertise in web development and a keen interest in AI technologies. I have collaborated with talented teams in companies to create software solutions. Currently dedicated to merge web development skills with AI advancements to craft intelligent and impactful applications and practiced it while building AutoLMS.

WORK EXPERIENCE

Web Developer

ESP/Software, Main Head Office, Bahria Town, RWP

- I have embraced the role of a proficient MERN stack developer.
- This role encompasses a comprehensive skill set, allowing me to excel in creating robust and dynamic web applications using the MERN (MongoDB, Express.js, React, Node.js) technology stack.

Frontend Developer

UCapacity, RWP

- Developed responsive and dynamic web interfaces using React and Tailwind CSS, focusing on user experience and modern design principles.
